\* During the Open Day attendees will have the opportunity to participate in two research studies conducted by Griffith University and the Queensland University of Technology (QUT). The studies are designed to evaluate new driver education methods for pre-learner, learner (L) and provisional (P1 and P2) drivers and to pilot an education module for parents/supervisors.

- The young driver study involves undertaking a video based training module.
- The parent/supervisor information session, presented by Professor Barry Watson, provides parents/supervisors with knowledge and strategies to better support their novice driver.
- Roadcraft demonstrations provide valuable 'take-outs' for novice drivers and parents/supervisors.
